

6th Form Independent Study Guide

Subject – **BIOLOGY**

- Organise your notes in a folder.
- Review work covered in lessons. You must ensure you understand the work and make a list of points that require further clarification, either use a textbook or see your teacher for help.
- Create a glossary of key terms.
- Complete the summary questions from your textbook and check answers at back of textbook.
- Prepare for your next lesson. Identify the next learning objective and read the relevant material from the textbook.
- Complete practice exam questions. These can be found on the Pupil work drive, Departments. Mark these and make sure you understand the corrections.
- Make a set of brief revision notes/ mind maps or summary sheets. Try to include only key facts and use images and colour to help you remember. Refer to the specification to ensure you have covered all the key points.
- From December complete a past paper, one per week, and mark it.
- Access the material that is visible to students on Kerboodle.
- Look online at www.newscientist.com and read articles that you find interesting to broaden your knowledge.
